

EUROGUSS 2020

Trade Show Review

HENGST SE

Georg FRANK GmbH

„A new decade and a successful trade fair right at the start.

This gives us hope that 2020 will turn out to be somewhat better than expected in many areas.

We would like to thank the numerous visitors at our booth for their interest during EUROGUSS 2020.

Helmut Geiger, Managing Director

It has once again been proven that EUROGUSS as a specialist trade fair is the ideal platform to present yourself. Especially if, like us, you are an absolute **specialist in the die casting industry** that focuses exclusively on this market.

Trends, developments and prospects for the upcoming year were discussed with customers and interested parties.

It is a rare thing to find so many specialists together in one place.

Thanks to the increasing internationality, many new contacts were made not only for the German, but also for the European and non-European markets.

This gives us hope that we will be successful again in 2020 and that we will confidently face any task that comes our way.

We were very pleased to be able to congratulate **Hengst SE** as a long-time Trennex customer on their **1st place prize in the 2020 International Aluminum Die Casting Competition** for their oil-coolant module.

The same applies to the company **Georg FRANK GmbH**, which, as a loyal Trennex customer, won the **1st place prize in the Zinc Die casting Competition** for the Initiative Zinc in the field of electrical engineering for a conductor rail made for ebm-Papst fans.

Congratulations also to the company **Andreas Stihl AG & Co. KG**, which was awarded the **innovation prize in the field of magnesium die casting** for a magnesium piston (MRI Alloy), which is used as an e-mobility component or as a filigree fitting component.
